This Operating Instruction (OI) establishes workcenter and mnemonic codes that are used to identify organizations elements to which maintenance personnel are assigned or locations to which they may be dispatched. These codes are designed for use in the maintenance data collection (MDC) system and other subsystems of the core automated maintenance system (CAMS). This OI applies to all maintenance squadrons functions and designated tenant organizations listed in attachment 1. This OI is prepared IAW AFSOCR 66-1 and T.O. 00-20-2.

**1. General.** Any previous workcenter or mnemonic codes not identified in this OI will not be used after the effective date.

**2. Change Requests.** Any required additions, deletions, or changes to this OI must be coordinated through maintenance systems analysis (LGLOA) and approved by the 16th Logistics Group Commander. All requests for changes will be submitted in writing using the format in attachment 2.

JENNIFER B. FOX, Colonel, USAF  
Commander  
16th Logistics Group
